Google Certified Project Manager with 2 years of experience leading large-scale technology projects, service delivery initiatives, and enterprise client engagements

PROFESSIONAL EXPERIENCE

Adapture

2024-2026

SERVICE DELIVERY MANAGER

- Point of contact for service delivery, project coordination, and strategic planning initiatives for a portfolio of 12 Cloudflare MSP clients, including Harley-Davidson, Carter's, RaceTrac, SharkNinja, Sunbelt Rentals, and DirecTV.
- Coordinated engineering, security, and operations teams to resolve service issues and adhere to Service Agreements.
- Led monthly reviews with executive stakeholders to discuss key initiatives, performance trends, and future priorities.
- Led weekly reviews with technical stakeholders to report on operations, project progress, and security events.
- Tracked incidents, service requests, change requests, and operational activities across multiple client environments.
- Managed incidents, risks, and client escalations to maintain service continuity and enhance client satisfaction.

PROJECT MANAGER

- Planned and executed 50+ enterprise projects for Cloudflare security, networking, and performance optimization.
- Led the IKEA Cloudflare migration, managing two global cross-functional teams, and coordinating the successful migration of 250+ websites across IKEA and 50+ Ingka Group subsidiaries, while meeting aggressive deadlines.
- Managed project scope, schedules, dependencies, using Kanban Boards, Gantt charts, Burndown charts, RAID Logs.
- Developed project plans, status reports, and executive updates on milestones, risks, issues, and key decisions.

DataDrivenPartners

2023-2024

DATA ANALYST

- Developed Power BI dashboards, turning real estate data into actionable market intelligence for financial institutions
- Cleaned & analyzed large real estate data using Python/R, improving data quality for a lending intelligence platform.
- Developed ML-driven automation processes, reducing manual processing time by 80% while improving scalability.

Sewanee DataLab

2022

DATA SCIENCE FELLOW

- Standardized data intake and validation process, improving quality of loan data used to combat predatory lending.
 - Developed Random Forest and Regression models to assess loan repayment risk and inform lending decisions.
 - Built interactive dashboards with R and Python to visualize applicant data, risk scores, and lending outcomes.
-
