- Dean's List (All Semesters) • Order of the Gown (Academic Honor Society) • Research Grant Recipient (Macro-Economic Modeling) • International Honors Scholar (Full-Ride Merit Scholarship)

PROFESSIONAL EXPERIENCE

Adapture | Initiant **Atlanta, GA**

Project & Service Delivery Manager | Cloudflare *May 2024 – May 2026*

- Led a $15M+ portfolio of 50+ enterprise Professional and Managed Services initiatives across cloud, cybersecurity, networking, application modernization, and systems integration, owning end-to-end delivery through production.
- Led key workstreams in the company's largest global migration, moving 250+ web properties across 50+ IKEA and INGKA subsidiaries from Akamai to Cloudflare while coordinating global teams, dependencies, DNS cutovers, and client handoffs.
- Managed Cloudflare enterprise engagements spanning BYOIP and Spectrum, large scale domain onboardings, Workers and CI/CD modernization, application security, and production readiness, coordinating cross-functional teams through go-live.
- Partnered with Account Executives, Solutions Architects, engineers, and client stakeholders to translate SOWs into executable delivery plans, managing scope, forecasts, resources, schedules, change control, and customer expectations.
- Managed concurrent enterprise projects through Agile, Waterfall, and hybrid delivery, owning integrated plans, milestones, RAID, dependencies, change control, production readiness, executive status reporting, and cross-functional issue resolution.
- Led Managed Services delivery and governance for 12+ enterprise accounts, coordinating Cloud, Network, Cybersecurity, and Operations teams while owning SLA/KPI performance, escalations, risks, executive reporting, and strategic priorities.

Cloudflare Solutions Engineer *January 2024 – May 2024*

- Supported Cloudflare application security deployments across WAF, Rate Limiting, Bot Management, DDoS protection, Rulesets, and SSL/TLS, including configuration, testing, troubleshooting, and production changes.
- Worked across Cloudflare DNS and network services, supporting DNS, caching, redirects, origin connectivity, traffic routing, and Cloudflare Tunnels while troubleshooting DNS, HTTP, TLS, and application connectivity issues.
- Worked with Cloudflare Workers, REST APIs, and Terraform-based configuration workflows, supporting edge logic, automation, infrastructure-as-code, troubleshooting, and repeatable management of enterprise customer environments.

DataDrivenPartners **Little Rock, AR**

Data Science Intern *February – November 2023*

- Engineered Python/SQL data pipelines and ML automation, reducing manual review by 80%+ across real estate datasets.
- Developed ML models for clustering and anomaly detection, delivering market intelligence to financial institutions.
- Built automated ETL and data-quality frameworks, improving reliability across analytics, Power BI dashboards, reporting.

DataLab | BetterFi **Sewanee, TN**

Data Science Fellow *June – August 2022*

- Built a credit risk tool using logistic regression, decision trees, and cross-validation to predict lending outcomes and risk.
- Automated data preprocessing and feature engineering in R, transforming borrower data into model-ready features.
- Developed risk analytics and geospatial visualizations in R and Leaflet, supporting a CDFI combating predatory lending.
